Family Meal Heating Instructions

Thanksgiving Turkey Dinner

1. Preheat your oven to 375°.
2. Place the covered pan in your oven.
3. Bake for 45-50 minutes, or until heated to your desired temperature.
4. Place the baguettes directly on an open oven rack during the last 10 minutes of baking.

Only need to heat a couple of portions?

We suggest heating up individual portions on separate microwave-safe plates one at a time.

For best results, cover with plastic wrap, and heat until the turkey is heated to your desired temperature, about 1½ minutes.
